Driving innovation is our mission

IT Automation

Providing rapidly deployable, easy to maintain & intuitive to use automation software

3PL Procurement

Providing a Plug-and-Play environment across states, regions or countries

3PL Warehousing

Redefining Inventory Management

Controlling complex environments to provide reliable inventory management leading to accurate asset management and accelerated throughput

System Integrations

Showing customers how to rapidly implement **Controls, Accountability, Visibility & Standardization** across all pertinent core systems.

Resolving business issues proactively

Prorizon Corporation is committed to complete customer satisfaction through a focus on accountability, innovation, continual quality management system improvements, and excellence for our customers worldwide.

Our Value Proposition

- Value..... Bring ongoing measurable value to the organization at a fraction of the cost of traditional options
- Simplicity..... Make it easier for users to get their job done (fewer screens and less process steps)
- Adaptability..... Software must be flexible to support customers the way they want to run their business
- Agility..... Able to rapidly change as the business changes
- Flexibility..... Integrate with your core systems (across subsidiaries, regions or countries)

Improve →

Impact of Disparate Systems • Mid-Level Management Visibility
 Cohesive and Comprehensive Reporting • Process Automation

3PL Procurement

- Able to implement centralized financial controls across disparate operations
- End to end purchase visibility (request → PO → Receipt → Payment → Disposal)
- Integrate all your purchasing & AP systems

3PL Warehousing

- Virtually eliminate lost, unaccounted or unbilled assets
- Minimize over-purchasing of assets
- Accurate tracking of inventory, volumes, values, returns, restocking and disposal

IT Automation

Example Process Improvements

- Zero touch automation
- User self-service catalog
- Software / hardware requests
- On / off boarding personnel
- Application access
- Cloud tool mgmt
- Server mgmt – (reboots; services turn up/down)
- Network equipment management
- And more!
